CAREER STATEMENT

MERN Full-Stack Developer with attention to detail and ability to debug HTML, CSS & Javascript. Creating a website or application that is both user friendly and aesthetically pleasing are goals that drive my work. My past experience has shown that I learn roles quickly and am given added responsibilities shortly after being given new positions. My six months spent in the Web Development Bootcamp through the University of Denver have given me the skills to hit the ground running in a Junior Developer position.

SKILLS

MERN Full-stack training: HTML, CSS, JavaScript including jQuery and Node.js.
