SUMMARY

MERN (MongoDB, Express, React & Node) Full-Stack Developer with attention to detail, strong work ethic and time management skills. Experience in the field include six months in the Web Development Bootcamp through the University of Denver. This certification has provided the skills to hit the ground running in a web development role.

TECHNICAL SKILLS

HTML5, CSS (including frameworks Bootstrap and Foundation), Javascript, JQuery, Firebase, AJAX, Node.js, MySQL, MongoDB, Express, React.js & Handlebars.js

PROJECTS

LIRI | Node.js, Javascript | Github   **Back-End Development**

A Node-based app to search multiple APIs.

- Utilizes OMDB, Spotify and Bands-In-Town APIs.
- Node-based, no front-end design

FriendFinder | Node, Javascript | Github | Live   **Full-Stack Development**

Web-based app to match the user to friends based their quiz score.

- Utilizes Bootstrap, CSS and Node for a dynamic UI/UX
- Tapped into Javascript to compare values for the new user and those in the database

Trail Headz | Javascript, Axios | Github | Live   **Front-End Development**

App that takes user search input and finds hiking trails located near them.

- Learned Foundation (CSS Framework) and implemented into the project.
- Utilized REI Hiking API, Google Geo Locations API and Colorado Hiking Subreddit API.
